**UNITED STATES CELLULAR CORPORATION  
QUARTERLY E911 IMPLEMENTATION REPORT**

United States Cellular Corporation ("USCC"), by its undersigned attorneys,  
hereby submits its fifth quarterly E911 implementation report pursuant to the Commission's  
order staying certain E911 phase II deadlines for many non-nationwide wireless carriers<sup>1</sup>

**I. Introduction**

USCC is a Tier II carrier under the *Order to Stay* issued by the Commission in 2002.<sup>2</sup> As a wireless carrier with systems in many rural markets, USCC faces particular challenges in upgrading its network technology and interacting with a wide variety of PSAPs across its service area. To meet these challenges, USCC has increased both the financial and personnel resources devoted to the deployment of E911 services throughout its service area.

---

<sup>1</sup> See *Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Phase II Compliance Deadlines for Non-Nationwide CMRS Carriers*, Order to Stay, 17 FCC Rcd 14841 (2002) ("*Order to Stay*")

<sup>2</sup> *Id.* ¶ 23

USCC personnel are in regular communication with PSAPs as well as USCC's two E911 vendors to monitor the progress of E911 deployment. USCC has also proactively contacted every PSAP in its recently-acquired markets in order to coordinate the timely deployment of the E911 service to match the readiness of the respective PSAP. USCC recently accepted an invitation from the State of Maine to become the first wireless carrier to deploy phase II service in an upcoming phase II trial project in Lincoln County, Maine.

## **II. Status of Phase I Requests**

USCC and its E911 vendor, TeleCommunication Systems, Inc. ("TCS"), actively work with all requesting PSAPs to deploy phase I E911 service throughout USCC's service area. In numerous cases, USCC has proceeded with deployment despite the fact that a particular PSAP's request did not constitute a valid request for service under the Commission's rules, including some markets where the PSAP made only an oral request.

To date, USCC has received 731 requests for phase I service and successfully deployed phase I service to 610 PSAPs. This represents full phase I deployment to approximately 83% percent of the PSAPs that have requested the service. Of the 121 pending phase I requests, 100 have been pending less than six months. Attached as Appendix A is a spreadsheet identifying those PSAPs requesting phase I service and the markets where USCC has deployed phase I

USCC has 21 PSAP requests for phase I service that have been pending for more than six months. USCC has an oral or written extensions from 18 of these PSAPs because the PSAP is not yet ready to deploy Phase I. Of the three phase I requests, two have been delayed because the requesting PSAP has not returned maps and traffic plans. These PSAP's have

requested that USCC delay deployment until the maps and traffic plans are approved. The last phase I request has been delayed by a trunking problem between the LEC and the PSAP

Thus, after excluding the phase I requests where the PSAPs are not ready as well as the phase I requests pending for less than six months, USCC has deployed phase I service to *all* PSAPs capable of receiving and utilizing the phase I information. This represents a 100 percent compliance rate for USCC's deployment of phase I service. USCC and TCS plan to continue their efforts to maintain full phase I deployment for all requesting jurisdictions

### **III. Status of Phase II Requests**

USCC has continued to deploy phase II E911 service in compliance with the Commission's *Order to Stay*. To date, USCC has received 182 PSAP requests for phase II service. Of these, USCC has successfully deployed phase II E911 service to 127 PSAPs in its service area. This represents a significant increase in the number of PSAPs with deployed phase II service from USCC since the last quarter. Appendix A identifies those PSAPs requesting phase II service and those markets in which USCC has deployed phase II.

USCC currently has 53 outstanding PSAP requests for phase II service. Of these, 25 have been pending less than six months

USCC has 28 phase II requests pending more than six months. Of these 28 outstanding phase II requests, 22 (79 percent) are in markets that are experiencing delays because the respective PSAPs do not have the necessary equipment to receive and utilize phase II information. In most of these markets, the requesting PSAP has granted USCC an extension whereby USCC agrees to deploy phase II service within 60 days of the PSAP notifying USCC of its readiness. In these cases, USCC and its vendors have completed all the necessary steps

toward phase II deployment and are waiting for the PSAPs to upgrade their systems. Five of the 28 phase II requests pending for more than six months are scheduled to be completed by mid-February.

As noted in earlier progress reports, USCC undertook an ambitious, time-consuming and expensive four year project to convert its existing TDMA systems to 1XRTT CDMA technology. USCC expects to complete virtually all of the CDMA overlays by the end of 2004 – a date significantly earlier than first report to the FCC. One of the benefits of this conversion was that USCC would be able to deploy a handset solution in these markets – an option that is not available for TDMA systems.

The last phase II request pending for more than six months is from Corpus Christi, Texas, which was scheduled for a CDMA overlay in third quarter 2005, with phase II deployment planned for immediately thereafter. USCC recently announced an agreement that, inter alia, involves the sale of this market to AT&T Wireless. USCC will continue to communicate with affected PSAPs regarding the timetable for converting its TDMA markets to CDMA technology and has agreed to provide updates on its progress as necessary.

USCC's conversion schedule from TDMA to CDMA technology resulted in deployment of phase II service beyond the six month period provided in certain markets. However, USCC submits that this ambitious, time-consuming and costly network overbuild provides the fastest path to full phase II compliance in USCC's rural TDMA markets. As noted by other Tier II and Tier III carriers serving small, rural TDMA markets, there are significant limitations on the accuracy of network solutions absent the time-consuming and expensive process of constructing location-only sites and/or securing necessary landlord and zoning

approvals to install so-called AOA antennas<sup>3</sup> To date, USCC has deployed phase II services to 26 PSAPs in markets that have been converted from TDMA to CDMA technology

In CDMA jurisdictions where new phase II requests have been received, USCC continues the process of installing necessary software loads on its switches to provide phase II service and upgrading all the trunking between these switches and the Mobile Positioning Center of its E911 vendor, TCS USCC and TCS continually integrate the CDMA switches serving these new phase II markets with the TCS equipment and the phase II software USCC's recently completed permanent SS7 connection between its network and TCS significantly reduced the time needed to deploy phase II in response to new PSAP requests. USCC is also continually updating the Base Station Almanac (BSA) used to improve and verify the accuracy of location information provided to PSAPs The BSA continues to be populated with detailed logistical information for all the cell sites serving USCC's CDMA markets where there are phase II requests

As noted previously, USCC has contracted with Marconi Corporation to do the necessary calibration, accuracy and drive testing to ensure that USCC's phase II service meets the Commission's accuracy requirements Marconi has conducted testing on USCC's CDMA switches that are serving PSAPs with live phase II deployments. These tests have been conducted using the CDMA location-capable mobile phones currently available to USCC's customers. Marconi's accuracy test results confirm that USCC is meeting the Commission's

---

<sup>3</sup> See, e.g., Tier III Coalition Petition for Forbearance, WT Docket No. 02-377, at 12 (affirming the inability of Tier III carriers to find a network-based solution without the need for additional location-only cell sites), *Ex Parte* Notice of Rural Cellular Corporation, December 19, 2002 (describing the difficulties in installing and utilizing AOA antennas at its cell sites)

requirement that 67 percent of the calls are accurate to within 50 meters and 95 percent of the calls are accurate to within 150 meters <sup>4</sup>

#### **IV. Status of Handset Deployment**

USCC remains in compliance with currently applicable handset deployment benchmarks. USCC began selling GPS-enabled handsets by March 1, 2003 and at least 25 percent of USCC's new handset activations were E-911 capable phones as of May 31, 2003. USCC's handset sales also exceeded the Commission's next penetration benchmark that at least 50 percent of USCC's new handset activations be E911 capable by November 30, 2003.<sup>5</sup>

In December 2003, over 92 percent of the total handsets sold by USCC had E911 capability. Currently, USCC has fourteen GPS-enabled handsets available for sale in its CDMA markets – the Motorola v120e, Motorola T731, Audiovox CDM8500, Audiovox 9500, SonyEricsson T206, Kyocera 7135, Kyocera 3225, Nokia 3585i, Nokia 3586i and LG VX4400, Kyocera Kx414e, Kyocera SEx47, LG vx3100 and the LG vx6000.

USCC will continue to track its sales of GPS-enabled phones in order to ensure compliance with the penetration benchmarks in the Commission's *Order to Stay*. USCC anticipates that it will be unable to meet the 100 percent deployment benchmark of May 31, 2004 for new activations because it has not completed the last part of the CDMA overlay in a few rural markets – CA-2, CA-9, ID-3, ID-5, ID-6, and Ft. Pierce, Florida. The CDMA overlay is scheduled to be complete on or around July 1, 2004 in the Idaho markets, on or around October 1, 2004 for the California markets, and by the end of October 2005 for the Ft. Pierce, Florida

---

<sup>4</sup> 47 C.F.R. § 20.18(h)

<sup>5</sup> See *Order to Stay* ¶ 27.

market. Once the overlay is complete in each market, USCC will only offer GPS-enabled phones for sale in that market. Although USCC will not attain the 100 percent benchmark by May 31, 2004, 95 percent of all its handset sales will likely be GPS-enabled by the end of May 2004. As noted above, in December 2003 alone, 92.9 percent of its total handset sales were GPS-enabled handsets.

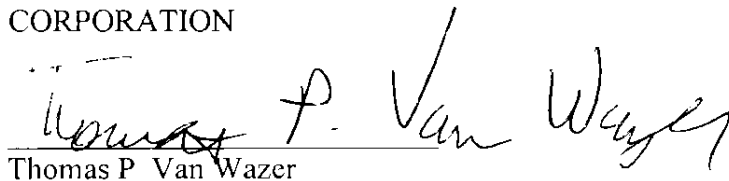

As of February 1, 2004, over 20% of the total handsets in use by USCC subscribers were GPS-enabled. This means that USCC has sold over 1 million GPS-enabled handsets.

**V. Conclusion**

As demonstrated above, USCC continues to make significant progress in deploying E911 phase I and phase II service throughout its service area. The commitment of significant financial and personnel resources has enabled USCC to move closer to its goal of meeting or exceeding the Commission's implementation deadlines for E911 deployment.

Respectfully submitted,

UNITED STATES CELLULAR  
CORPORATION

**AFFIDAVIT OF JAMES JENKINS**

I, James Jenkins, hereby declare as follows:

1. I am Vice President, Legal and External Affairs, for United States Cellular Corporation ("USCC"). In this capacity, I am familiar with USCC's E911 deployment efforts.
2. I have reviewed the foregoing USCC Quarterly E911 Implementation Report and believe that the facts contained therein are true and accurate.

I declare under penalty of perjury that the foregoing is true and correct, to the best of my knowledge and belief.

Dated this 30<sup>th</sup> day of January, 2004.
